

Large Volume Injector

Wearables.

Customer benefits:

- High tack of the adhesive to skin ensuring a strong bond immediately after application
- Low peel strength for easy removal after use
- Repositionable tapes to ensure the best bonding
- Good shear resistance of the adhesive to prevent movement of the patch during injection
- Low Trauma tapes for application
- Decades of tape die-cutting and processing expertise

Products:

- DuploMED® 22260 / Flexible tape with beige colored foam carrier and medium adhesion (white foam available)
- DuploMED® 62201 / Silicone adhesive with nonwoven carrier for painless removal
- DuploMED® 45150 / Acrylic adhesive with nonwoven carrier
