Removable protective foam films

Protect products securely and reliably

DuploCOLL® 17613

High-tech foam for surface protection

Removable protective film

— Temporary and permanent mounting protection that can be removed from almost all surfaces (tiles, laminate, parquet, carpet, walls, and furniture parts, etc.) without leaving adhesive residues.
— Single-sided adhesive, liner-free, pre-rolled as a roll
— Slip-resistant due to single-sided adhesive surface
— Reliable protection against pressure and impact
— Keeps dust and moisture out
— Also suitable for surface protection of glass, ceramic, wood, and metal
— Reusable multiple times
— Tested for long-term protection on glass
— Slip resistance due to rough surface

Fields of application

— Temporary suitable for protection during painting, carpentry, and coating work
— Scratch protection for surfaces from small falling objects
— As a base for other materials

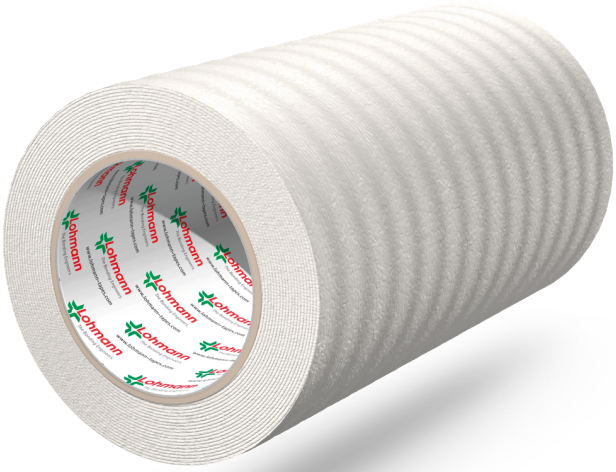

Product application

— Use on dry, dust- and dirt-free surfaces
— Apply only with suitable pressure, avoiding overstretching the material.
— Use at surface and ambient temperatures between +15 and +35 °C.

Product variants

Name	Material	Adhesive property
DuploCOLL 17613	1 mm PE foam	Removable
DuploCOLL 17613 X	1 mm PE foam perforated for easy tearing	Removable
DuploCOLL 17613 X	1 mm PE foam die-cut to customer specifications	Removable

Application examples

Installation & Assembly

Sanitary and installation sectors, protection during window installation

DuploCOLL 17613 provides perfect surface protection for high-quality and delicate flooring. It can be easily and securely applied during subsequent work in nearly completed rooms, removed without adhesive residues, and reused multiple times. Its low thickness also allows for use in door areas.

Your Advantages

- Works on nearly all surfaces
- Available in widths up to 1.5 m
- Quick deployment of the protective film through easy cutting and trimming
- Low installation thickness of 1 mm
- Repositionable, residue-free removal, and reusable

Interior Construction

Protection for Stair Treads

Simple protection for stair treads made of glass, stone, painted steel, or wood when surfaces already installed or remaining need safeguarding at the end of interior construction or during renovations. Unlike hard protective covers, the PE foam backing with foil reinforcement minimizes the risk of scratches. For extreme loads or during rough construction work, the protective underlay can also serve as an intermediate layer for more robust coverings.

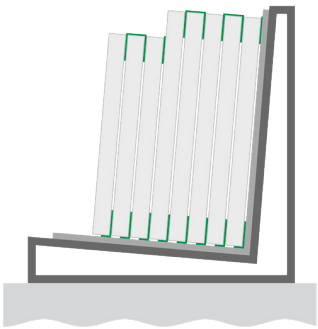

Your Advantages

- Residue-free removal from almost all surfaces
- Quick installation through easy cutting without tools
- Usable as a top or intermediate layer

Transport & Storage

Protection for windows, doors, furniture, metal sheets, glass panels, decorative elements, and more

Secure protection for transporting furniture and delicate goods with the self-adhesive surface protection DuploCOLL 17613, available in widths of up to 1.5 m.

Your Advantages

- Self-adhesive surface protection (suitable even for delicate furniture surfaces)
- Secure fixation without slipping, easy and residue-free removal
- Flexible sizing through simple manual cutting or custom ordering up to 1.5 m in width
- Adheres even when wrapped around (sticks to its own backing material)
- Reusable multiple times (stack after removal and keep ready for the next use)

The perfect bonding solution? The one tailored to your application. We support you from the idea to its integration into your process.
