

Always the right choice as component in PVC scanner oder temporary fixed profiles - easy to use and easy to remove for enormous time savings in the renovation process.

One-Step Solution

Saving time and resources by bringing the self-adhesive coating during the extrusion process in one step to the product.

Maximum Efficiency

No overstretching thanks to the innovative paper liner during the extrusion process for precise application and quality of final products.

Competitive Advantage

Differentiate from the competition with an innovative solution that combines efficiency and quality in the application.
